

OpenStreetMap volunteers are mapping all buildings in New Orleans, and we'd love your help!

Our volunteer-driven nonprofit mapping project is calling on local neighborhood experts and map enthusiasts to join our effort.

Starting this month we're working with building data provided by the City of New Orleans to get every structure in the city mapped. This will make our map richer and bring us closer to having the best, most complete and locally-relevant map of our city.

OpenStreetMap (OSM) is like the Wikipedia of maps, where everyone can edit the neighborhood they know. We've shown around the world that our model of volunteer crowd-sourced map data can make for the best maps around. Also, making our own map can be educational and fun!

When: **Wednesday, January 28th at 6 pm**

Where: **Rosa Keller Library and Community Center**
4300 S. Broad Street
(intersection of Napoleon and Broad streets)

Experienced and new OSM mappers, along with those who would like to learn more, are invited to attend the first NOLA Buildings OSM meeting at the Rosa Keller Library and Community Center on Wednesday, January 28th at 6 pm.

Food will be provided as we show folks how to use OSM's simple tools for mapping buildings, while watching as our mapping efforts contribute to the growth of the NOLA OSM. If you can bring a laptop computer, please do. A small number of extra computers will be available.

Please RSVP by email to mtoups@cs.uno.edu.
